About Project-
Nutricart.com is a web application developed by Rohit Kumar that serves as an online grocery shopping platform. The application is designed to offer two main user roles: Admin and User. Admin users can manage grocery product categories, add products to categories, perform CRUD operations on products, while User users can browse products, add them to the cart, and make purchases.

1. Install the required dependencies using "pip install -r requirements.txt".
2. Run the "app.py" file in the "NutriCart" folder.
3. Visit the port provided in the terminal window to access the application.
4. To access the **"admin" section, use email: "rk@gmail.com" and password: "11"** (as an integer).
5. For the **user section, use email: "rohit@gmail.com" and password: "00000"** (as an integer).
6. To access another **user section, use email: "avinash@gmail.com" and password: "00000" (as an integer)**.
7. Refer to the "grocery.db" to find other users' login details.
8. Navigate to the "register" route to add a new user.
9. Use the two different login options provided in the navbar.
10. Follow the user-friendly UI to add categories and items in the Inventory (admin section) or add items and search for products in the cart (user section).
